Supplier management solutions

CleanChain provides one secure and centralized location to record and track your chemical, wastewater and regulatory compliance metrics across multiple standards and requirements.

Benefits to you

> **Ease of use**
Bulk upload your chemical inventory quickly by SDS drag-and-drop or excel template.

> **Visibility**
Connect and share your data with your customers for greater transparency and progress tracking.

> **Greater compliance**
Quickly identify chemicals linked to ZDHC MRSL and other certifications using interactive dashboards.

> **Understanding**
Multilingual in-time support and training available.

> **Time-saving InCheck Conformance**
Preview your score so you can make improvements before generating ZDHC InCheck reports.

> **Better value**
Access your wastewater data and upload or transfer ZDHC wastewater lab reports, free of charge.

> **Link your account**
Seamlessly to your ZDHC Gateway account.

> **Wastewater Testing**
Wastewater testing by our partner labs establishes protective measures against prohibited chemicals.

> **Verified InCheck**
Perform ZDHC Verified InCheck via our partner verifier.

Key features

Performance benchmarking and conformance reporting

Linked to third-party standards
i.e. ZDHC Gateway, Chemical score–Scivera & ToxServices

Customer linking to seamlessly share data

Bulk upload multilingual safety data sheets

Multiple data entry processes, including system integration

One system for all your inventory

Analyze wastewater and sludge according to ZDHC wastewater guidelines

Submit data to ZDHC Gateway – wastewater module for suppliers, ensuring transparency and compliance
